# **Financial Independence Building Blocks**

SAFE investment? <u>Before</u> & <u>After</u> taxes with cost to sell ... DB#32

How might I determine if this investment is SAFE?

64 238 9TT

Financial Independence Overview DB#2

# Review of everything you need to understand this 'tool called money'

Financial Independence CASH DB#30 Before tax & exp = I'm going to spend this money in the next 5 years, I need some growth and safety.
(in a <u>before</u> tax account)

Financial Independence Invest Now DB#3 = You might say, "I don't care, just tell me how to invest now"

Financial Independence CASH DB#31 After tax & exp = I'm going to spend this money in the next 5 years, I need some growth and safety.
(in an <u>after</u> tax account)

We are not financial advisors. Our training materials are for educational purposes only and merely cite our own personal opinions. In order to make the best financial decision that suits your own needs, you must conduct your own research and seek the advice of a licensed financial advisor, if necessary. Know that all investments involve some form of risk and there is no guarantee that you will be successful in making, saving, or investing money; nor is there any guarantee that you won't experience any loss when investing. JohnnysSpeedLab, LLC and LifeAmp, LLC do not accept any responsibility for any loss which may arise from reliance on information contained on this site.

You are responsible for your actions and smart decisions and do your own research!

Why buckets? To help you sleep at night, you will be able to invest more aggressively with the money that you do not need any time soon.

Today we will focus on all three buckets

#### What does 'SAFE' mean to you?

#### What is your 'RISK tolerance'?

#### For the last 20 years of history we will look at:

- 1 month drop (1M drop)
- 1 year & 2 year drops (1 year drop) & (2 year drop)
- 2000 Tech Bubble (2000 drop (24M))
- 2008 Great Recession (2008 drop (13M))
- Number of negative annual returns in 20 years

#### We will also look at:

- Standard deviation (1M, 12M stdev) and Variance (12M VAR) for Statisticians
- 20 year GAINS for \$100,000 Before & After Taxes

Too much DETAIL!

'Working' SUMMARY

APPENDIX

- How I calculated the impact of FEDERAL TAX

# FI Building Blocks CASH EQUIVALENTS ... DB#31 <u>AFTER</u> Tax

#### How did I calculate the impact of AFTER federal tax?

I created a 'Rate of Return reduced by Taxes'

Using Fidelity/Vanguard data returns without taxes to 'Highest marginal tax rate, no state taxes included and "After taxes on distributions and sale of fund shares - 5yrs"

|              |       | Rate of Return reduced by Taxes* |                          | AVG 20 yr return | reduced       |
|--------------|-------|----------------------------------|--------------------------|------------------|---------------|
|              |       |                                  |                          | From Before Tax  | To: After Tax |
| VWIAX        | VWINX | 30%                              | 40% stock / 60% bond     | 7.6%             | 5.2%          |
| VDIGX        |       | 25%                              | 100% dividend stock fund | 8.9%             | 6.7%          |
| VTSAX        |       | 23%                              | 100% stock               | 8.0%             | <b>5.2%</b>   |
| <b>STOCK</b> |       | 20%                              | actual stock LOW         | 16.0%            | 13%           |
| <b>STOCK</b> |       | 20%                              | actual stock DLR         | 16.7%            | 13%           |
| VGSLX        | VGSIX | 13%                              | 100% REIT                | 12.8%            | 10%           |
| VWIUX        | VWITX | 5%                               | 100% tax exempt bond     | 5.5%             | 5.2%          |
| VWAHX        | VWALX | 5%                               | 100% tax exempt bond     | 5.5%             | 5.2%          |

#### Notes:

\*Fidelity/Vanguard sites: Highest marginal tax rate, no state taxes included and "After taxes on distributions and sale of fund shares - 5yrs"

For stocks used simple 20% long term capital gains

CASH OR CASH EQUIVALENT INVESTMENTS

# FI Building Blocks CASH EQUIVALENTS ... DB#31 <u>AFTER</u> Tax

I am often asked – How do I get a better return on the money I will need soon? First, anything outside of CASH is likely to be higher risk.

Second, you are unlikely to get 'hurt' by inflation because you will spend it soon. With the obvious out of the way, I will look at a process to 'assess the risk'. I will walk through the process with EXAMPLES.

I will look at each of the SEVEN (7) methods and assess their performance over:

- 1) A turndown period (2008 2012)
- 2) A turnup period (2015 2019)
- 3) On an average return basis (using 20-year average return)

I will *attempt* to simplify of this with a SIMPLE SINGLE RATIO
